

Dimensions

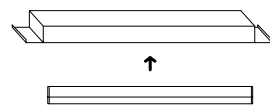

Installation

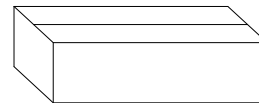

Technical features

Input voltage	220VAC±10%	Wavelength	254nm	Working temp.	-25°C to 60°C
Input frequency	50/60Hz	UV-C tube type	Quartz, no ozone	Storage temp.	-30°C to 70°C
Power	8W	UV-C tube brand	Osram	Housing material	Aluminium
Sterilisation area	5m³ to 8m³	Luminous intensity	7800cd	UV-C tube lifespan	9,000 hours

Packing

Inner box size: 365x82x86mm
1 pc / 0.57kg

Outer box size: 390x360x450mm
20 pcs / 11.8kg

Warnings

UV-C light is harmful to human skin and eyes. This device may only be used in an empty cabin, either with a failsafe detection system or a failsafe timer, at off-peak times.

This is not a medical device. Local regulations, where existing, may not be met. Installation by qualified staff only. Do not test when the car is occupied.
